2. Guideline to assemble

Refer to the symbols in figure 1 to connect rails and viaducts.

Symbol list

- Straight track 110mm (No feeder)
- Straight track 55mm (No feeder)
- Straight track 25mm
- Curved track R195mm 30°
- Viaduct single straight 110mm (No track)
- Viaduct single curve R195mm 30° (With track)
- Bridge single (Red) (With track)

Location of piers

Place the pier at the specified alphabet location. The number 1 to 4 means the number of pier place.

3. How to assemble the piers and feeder cables to the viaduct

3-1 How to assemble the pier and the viaduct

Set top of the pier at side of the viaduct as the fig.2. Set the another viaduct correctly as the fig.3. Set suitable pier parts as the fig.4 to make smooth slope angle.

3-2 How to assemble the pier, the iron bridge and the viaduct.

Set top of the pier at side of the iron bridge as the fig.5.

3-3 How to set the narrow feeder cable with viaduct track.

Remove the straight track from the viaduct by unscrew. Remove the feeder cover from the viaduct. Remove the straight track from the viaduct and set the feeder cable plug at still position. Set the straight track on the viaduct by screw. (Make screw softly avoid screw loosen.)

4. Trouble and repair

- The user is responsible for any trouble, accident, or injury caused by misuse, disassembly, or modification this product. Rokuhan will not repair a product which has been opened, taken apart, or modified.

- Specification and appearance of our products are subject to change without prior notice.
