Thank you for purchasing this Rokuhana product. Please read this instruction manual and the cautions on the package carefully before operation and operate properly.

1. Caution
- For the best results, connect and disconnect the track on a flat surface. To avoid damage to rail joiner and rail, do not twist or use excessive force and large angles when assembling your track.
- Check your track is connected correctly before running your train. Each rail joint should be flush no bumps. If a rail is not flush, the train could derail and could cause damage to your train or track.
- Handle the cord with care to avoid breaking or short circuit. Dirty track is evident in jerky movement of your train and headlight(s) flicker. This power cannot reach the engine if track and wheels are dirty.
- Do not store in a high-temperature/humidity area or away from sources of heat. Also be careful with chemicals such as thinner to avoid deformation.

2. Parts list
- Uncoupler (body)
- Uncoupler part for EU coupler (marked EU)
- Uncoupler part for Arnold coupler (marked A)
- Instruction manual

3. How to attach & detach Uncoupler part
- Arnold uncoupler part (marked A) is mentioned in this case.
- EU uncoupler part (marked EU) can be handled in the same manner.

3-1 How to attach Uncoupler part
- Insert Uncoupler part like the arrow

3-2 How to detach Uncoupler part
- Press down using a toothpick

4. How to operate Uncoupler part (up & down)
- Operate by hand
  - Slide lever to this side, then Uncoupler part is low-down.
  - Slide lever to this side, then Uncoupler part is up-lifted.
- Operate by Rokuhana controller
  - Use Rokuhana controller R03 or Rokuhana turnout switch C002, to operate Uncoupler part (sold separately).

5. Arrange coupler
- Rokuhana locomotive D051 is mentioned in this case as one of motor cars.
- Please arrange specified Arnold coupler A040 (sold separately), to enable uncoupling Arnold coupler.
- Please arrange long type EU coupler A022 (sold separately), to enable uncoupling EU coupler.

6. Setting coupler
6-1 Select coupler
- Rokuhana locomotive D051 is mentioned in this case as one of motor cars.
- Detach normal coupler from D051, then attach specified coupler onto D051 like this.

6-2 Set Arnold coupler A040
- Equip motor car with A040
- Existing Arnold coupler is OK

6-3 Set EU coupler A022
- Equip both of motor car and passenger car with A022
