

S073-1Feeder type Train approach Alarm(For ROKUHAN Straight rail) Instruction manual

Thank you for purchasing Rokuhan products. Please read this manual carefully before using this product.

- For best results, connect and disconnect the track on a flat surface. To avoid damage to the rail joiner and rail, do not twist or use excessive force and large angles when assembling your track.
- Please use controller RC-02, RC-03, or RC-004.

< Set contents >

Blinking base...1 pc

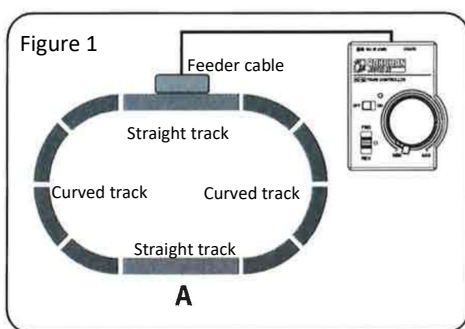

Train approach alarm
(Green, Blue, Orange)...1 pc

① Other necessary items

- Rokuhan straight track(any one of 55mm, 110mm, 220mm, 440mm)
- Rokuhan train controller(any one of RC-02, RC-03, RC-004)

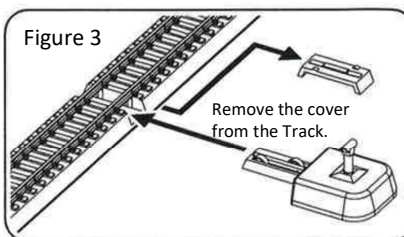

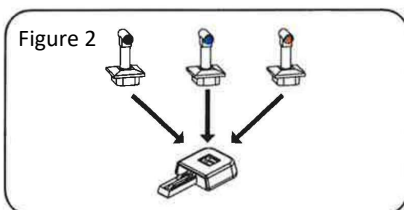

② How to play-1

Assemble your layout as desired and with the controller powered off, connect the feeder cable to the straight track as shown in Figure 1.

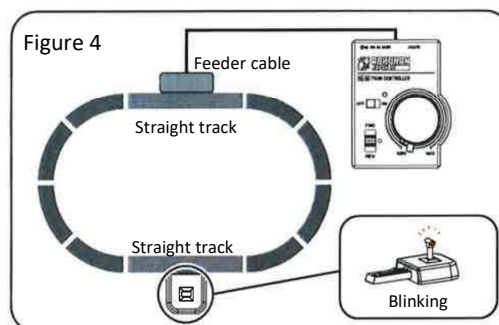

③ How to play-2

Attach any Train approach Alarm to the flashing base as shown in Figure 2 and connect the flashing base to the Straight track in the same way as the feeder cable.

④ How to play-3

When you turn on the Controller and move the switch to FWD or REV, the alarm LED will flash.

* If the controller is RC-004, the LED will be dimmer than when using RC-02 or RC-03.

⑤ Other points to note

If multiple alarms are placed in the layout, the flashing timing will not be synchronized.
The flashing speed varies from one alarm to another.
This product does not have the function to detect the approach of a train and change the lighting pattern like the actual train approach alarm.

⑥ Trouble and repair

- The user is responsible for any trouble, accident, or injury by misuse, disassembling, or modification of this product. Rokuhan will not repair a product that has been opened, taken apart, or modified.
- Specification and appearance of our products are subject to change without prior notice.
- Contact Rokuhan customer service if you have any queries.
